**Submitter Comments:**

Glue Traps are cruel and unnecessary. Mice can be caught various other ways, but not glue traps. Birds including native birds are being caught in these traps. We don't have enough native birds, with habitat destruction, fires and floods to risk ANY to glue traps. The birds and mammals (some Native) being trapped are suffering stress and then an uncertain death depending on who is using these stupid glue traps. Please stop the sale of these traps and let people choose one of the many methods of catching mice which is not cruel.
