Submitter Comments:

Until recently I had no idea that Glue Traps existed. I have seen photo's of what can happen to wildlife, insects etc. when these traps are utilised. Yes, there are pests out there that are not welcome around our homes, but these traps do not differentiate between good and bad. Whatever gets caught in them die a shocking death which, in some cases can take ages if the traps are not inspected regularly. PLEASE do what you can to get these traps abolished - there are other ways to deal with this problem.
