Submitter Comments:

I ask that the committee consider impacts of animal management processes and unintended consequences on our native wildlife, as well as the humaneness of the process. I ask that traps be included as a threatening process in the Bill in particular the use and availability of glue traps. These traps are freely available from Bunnings and are sold without any attempt to educate purchasers of the possible inhumane consequences arising from their use. I would urge the committee to ban the retail sale and use of glue traps.
