Submitter Comments:

I am totally disheartened with the sale & application of these Glue Traps. Any animal that comes into contact with these horrible things becomes permanently trapped & if not found in time the poor trapped animals die a slow and agonizing death, We are supposed to be an modern & humanitarian society. We, in Australia are quick to point the finger at outer countries who we believe are treating their animals & wild life in a cruel manner but low and behold we allow things to happen here that are no different to the countries that we complain about & point our fingers at for doing the same thing. Surely, we are better than that. Please, stop the use of these terrible traps & give us a clear conscience when complaining about the way animals & wildlife are treated in some other countries.
