**Submitter Comments:**

Glue traps clearly come under the auspices of animal cruelty. Trapped rodents and other animals suffer immeasurably during the days that it takes for them to die. Glue traps rip off areas of skin, fur, and feathers from the animals' bodies as the trapped animal struggles to escape. Many animals often chew off their legs trying to get free which is never successful. They simply suffer excruciating pain as they maim their own bodies. Glue traps are beyond cruel. Try putting your finger on the glue area and see what happens then tell me that glue traps are not animal abuse.
