**Submitter Comments:**

I am one of many people world-wide who are appalled by the sale and use of glue traps. I hope the Committee will, as quickly as possible, work towards the banning of these lethal devices that are killing so much of our precious wildlife. The slaughter of these animals is bad enough, but many creatures are dying slowly and painfully because of the traps. The sale and use of glue traps is unconscionable, and should be discontinued. It is incompatible with a society that cares for its wild creatures and their well-being.
