Submitter Comments:

Dear Sir/Madam,Re: Inquiry into the Animal Care & Protection Ammendment Bill 2002.Please include Glue traps in your inquiry as they pose a real threat to our native animals, birds, reptiles & beneficial insects which get caughtcup in these traps and die an agonising death. Since these glue traps cannot just target flies & mosquitos, then they are too much of a threat to be allowed to be sold publicly. With all the pressures on our environment and the high rate of extinctions, we need to do what what we can to protect our native wildlife.Kind Regards,Rae O'Brien.
