**Submitter Comments:**

I would like to strongly urge the Queensland Parliament to legislate to ban glue traps of any variety. These traps represent nothing but a slow and agonising death to ANY creature that comes in contact with them, even animals considered pests. There are far more humane methods for killing pest animals that don't pose a risk to our precious wildlife. It is not about labelling and education because people will still blatantly disregard any instructions if these traps are effective in killing a variety of pests. They should simply not be sold.
