**Submitter Comments:**

Queensland has a sorry history when it comes to dealing with the environment, and Australia's heritage of flora & fauna. This one is too much altogether. We've lost roughly half the species of indigenous creatures in this country during my own lifetime. And I'm wasn't even born till over a century and a half after Europeans began their take over of this continent! We CANNOT keep behaving so badly. So BAN these glue traps, right now. And any other traps that would endanger native species of birds, animals, reptiles, etc.
