Submitter Comments:

Glue Traps are one of the cruelest forms of killing animals that I have heard of. It is absolutely disgraceful and tragic that they are available in Australia, that stores stock them and that ignorant people buy and use them. Is there no empathy for living beings in this government, in shop owners, in society or individuals? How could these barbaric and brutal objects be missed out of the inquiry into care and protection of animals? I ask, plead, demand that these revolting GLUE TRAPS be banned forever. No importation. No home manufacturing. Removal asap from shop shelves.
