Submitter Comments:

Please consider the prohibition of importation and sale and use of all glue traps and fruit netting which is more than 2 mm in gauge size to stop the cruel and painful death of all animals which are caught in such deathtraps. Please provide our law enforcement officers with suitable equipment and training so that they are able to perform their duty well in the euthanasia of an animal when called upon. There is needless suffering when a mortally wounded animal has to be put down with unsuitable armaments.
