**Submitter Comments:**

I would sincerely hope that the new laws will include that glue traps are banned and no longer available for sale anywhere. I purchased one of these a few months ago when I had an infestation of flies inside my home. When I set it up I realised how cruel they are and threw it away, folded the glue strips against themselves to cover the glue side. I prefer natural ways of preventing nuisance insects and didn't realise until I set it up that this method is cruel and I don't advocate cruelty to control pests. Thank you for accepting my submission.
