I wish to make an input to the QLD animal cruelty law review. I believe that the committee has not considered glue traps. These traps by their very nature are extremely cruel to both native and feral animals, they are not designed to be humane and as such all animals trapped by them die a slow, cruel death. In this modern society traps such as these should be totally banned. If an animal needs to be eradicated, there are plenty of more humane alternatives available. Please lead the way and ban all glue traps.
