Submitter Comments:

In my many years of rescue work I have seen the best and worst of human behaviour. The neglect , torture , trauma and pain inflicted on our precious animals by so called humans is absolutely atrocious. Penalties by law are hardly sufficient to make a difference and our government does little to change that. New laws and guidelines must be introduced and vigorously enforced so our beloved, animals, domestic and wild, are safe from inhumane behaviour. Jail time is what is needed to try to stop some offenders. The current penalties do nothing to deter these despicable people. Please do everything you can to assist us, rescues and privately we are not equipped enough or supported by our government. Please, please change laws and help us as well to stop these horrific tortures.
