**Submitter Comments:**

Being humane to all living breathing beings is for everyone. Companies that generate a profit from cruel methods of killing an innocent animal that is trying to survive is Cruelty. Glue traps are one of the cruelest methods of extermination on the market. The animals which is often birds, squirrels, lizard and other small living beings are stuck for hours or days trying to free themselves tearing limbs off or just stuck until they starve to death. Personally I feel it takes a sick mind to think that this is right in anyway. GLUE TRAPS must be banned. Any store that sells these traps I will not shop at. I will not support profit over humane practices for living beings. We need to realize that we have taken wild animals homes away by over population. We need to find a way to exist without such cruelty. Kelly Gallagher
