Submitter Comments:

I would like to recommend that CCTV be used in all slaughter houses and not just where horses are slaughtered, why is there a difference between cattle, pigs and horses? The bill should also acknowledge that non human animals are sentient beings and should be treated as such. Calf roping should be banned as it has been in other states, what sort of society do we have when we allow terrorising a baby animal and call it entertainment. It is the the worst kind of bullying and sends the wrong message to children who would watch this so called entertainment. Lastly there should be an office of animal welfare who can oversee and properly manage any industry or individuals involving animals
