Submitter Comments:

these products are killing and injuring too many wildlife , they need to be banned,this is a cruel way for our wild life to die , please do not allow this product to continue to be sold , these products are not suitable for use by the general public , they should not be sold to the public , in proper use is causing to many birds and wildlife to suffer a painful injury or death , when wild life carers or vets try to save or rescue a native animal or bird on a glue trap , it makes it hard for the animal to be removed without further injury to the animal or bird,there are much better safer ways to control mice and rats and other vermin , the glue traps do not discriminate , and trap all wildlife
