**Submitter Comments:**

Thank you for holding this Inquiry. I would like to ask that you consider the welfare of wildlife as well as domestic animals. The issue of traps in general, and the sale of glue traps for domestic use, needs to be addressed. Caring and protecting our wildlife needs to be about humane treatment. However, it's also about the larger picture that we are already endangering and losing native species at a disturbing rate, so they must not become collateral damage in the management of what we regard as 'pests'. Thank you.
