Submitter Comments:

though this Bill is a welcome improvement in Animal Welfare it is not as expansive as required as it falls short in a number of areas as follows.12. The penalty on RESCUE organization for rehoming, a previous to their ownership debarked dog, is barking mad.14. Include unattended tethering and electric collars.16. Include 1080 poison.17. Calf roping to be banned and not allowed in any form at Rodeos.22. Independent CCTV to be a requirement in ALL animal species slaughterhouses not just a token species. Above all other industries stronger deterrents are warranted against cruelty offences.

Inspectors to be given powers to enter any animal facility, farm or slaughter without warrant or permission. No statute of limitations for animal cruelty offences. Included duty of care animal transportation.
