Re: Support of Greens Climate Transition Bill

Dear Queensland Government,

I would like to express my support for the Greens Climate Transition Bill.

I support this bill because it:

1. Bans new coal, oil and gas resources projects in Queensland
2. Sets a 75% emissions reduction target by 2030, to reach net zero by 2035 (in line with current science and the Paris Agreement)
3. Legislates a target to phase out fossil fuel exports by 2030
4. Creates a new Queensland Climate Transition Authority, to consult and work with affected workers and communities on a fair transition plan
5. It supports the latest IPCC report, which states that we need to stop new coal and gas right now!

Yours truly

Jim Thomas BSc(Hons) LM
