Subject: Submission on the Queensland Climate Transition Bill 2023

Categories: Submission

To the State Development and Regional Industries Committee:

I'm writing to express my opposition to the Queensland Climate Transition Bill 2023. I want a climate transition plan for Queensland that's consistent with the science and leaves no one behind.

It is short-sighted and imprudent to shut down our coal and gas industries. We all want clean energy, but WE HAVE NO BASE-LOAD POWER OPTIONS currently available. We run the risk of exploding energy costs and irregular supply. That is not the outcome we want to see. We need a rational transition, not one driven by ideology. I have travelled in India. Seriously, if you think shutting down our coal and gas industries will have ANY impact on the world's climate, well, that lacks cognitive rigor. We have a responsibility to lead, but to lead well, not to cause needless pain to the Australian population. PLEASE REJECT THIS BILL.

Kind regards,
Greg Wright
