---

The toll roads are too expensive so they are always empty and the main roads are still extremely busy. Traffic light sequences were changed in the areas where tunnels are located which makes the traffic worse - I guess it's a way to try and force people into the tunnel but it's not working and people still use the main roads. If tolls were cheap I would use them daily but it is not worth \$10+ per day for a return trip to work on top of the extremely high fuel price.

Regards  
Richard
