---

1. The price of Qld tolls is too expensive for the average salaried motorist to use them frequently. This increases congestion on roads. Reducing the cost of tolls will have increase their use and ultimately a motive revenue.
2. Motorists should not be charged a toll during times of roadworks or maintenance. There is no benefit to be gained from using a motorway/ toll road if motorists are held up through disruptions and being forced to use only one lane.

Thank you  
Elizabeth Drew
