I would the inquiry committee to look into the following points.

- 1, Toll charges in respect of usage.
The charges were originally based on minimum number of anticipated to use the facility.
The charges have been increasing regardless.
- 2 Return trips should be rewarded with reduce charges.
3. Payment collected on prepayment should also be rewarded by extra discounts depending
On the monthly spending
4. Qld Gov has been helping toll companies to collect the toll, what are the companies paying
To help the motorist.
5. In general payment method are not user friendly for all.
6. Gov has been collecting revenue on Road Tax and Petrol so why the Toll companies
Are required to manage the roads. Infact I see the Gov is penalizing the Motorist
By charging in 3 different form.

I hope this will help to question in a constructive form
