Good morning,

I am grateful that we have some of the best roads in Australia and I understand that the “user pays” system is fair and that the company that has made substantial investments need to make a return.

The issue is the we pay a toll for a service or rather the ability to travel safely without congestion at a good speed of up to 100k/hr.

I travel regularly from Forest lake to Redcliffe, I endure the Logan motorway upgrade, the Gateway upgrade and the never ending story of the Deagon disaster.

Simply put, stop charging the full toll when there are continuous months if not years of roadwork's. It is not fair.

Barry Stronach
