To whom it may concern

My submission is based on the price structure for trucks, why does my skip truck with 2 axels and a GVM of 14t pay the same as a B Double to use the tolls. I understand that I should pay more than a car or ute, but I shouldn't have to pay the same as a B Double. If the price structure was a lot fairer, I would use the tolls in and around Brisbane more.

Regards Brett Batterby
