To the Palaszczuk Government,

I believe that Tolls on Tunnels and Bridges are so expensive that it must be hard on the finances of those that have to use them regarding peak hour holdup on the main city roads.

It appears that there are insufficient users due to this expense and therefore the Tunnels are not patronised enough. If the Tolls were reduced to half the price or less there would be more drives using these roads making them worthwhile and I believe the Toll system would collect more money by usage of these roads. I don't blame drives from Boycotting such because of this excessive expense.

Thanks

*Ron Smith*
