Afternoon

We are a family owned and run small business located Superior skip bins in Gympie Qld.

The effect of Ri-con collapse has impacted our business not only in the monetary capacity also in trust.

The monetary cost to our business being \$2365.50 but this cost is not the real cost, the real cost that impacted us

Does not include fuel, driver wages, shed cost (recycling cost) Gympie council (dumping costs) which we have had to absorb.

GST we have paid due to length of time account was outstanding,

Numerous occasions Ri-con was contacted only to be told we have a large payment coming in (always next few weeks)

and we would be first to be paid.

In closing I believe QBCC should have insurance premiums to cover these costs as some other industries do.

I applied for a fuel account and had to put my house up as guarantee.

Kind Regards

Debbie Higgins
