**Subject:** Submission regarding trail bikes

My name is Jai Smith.

I have been riding off road trail bikes for most of my life. Im now 42.

Recently there has been more restrictions for unregistered bikes riding in forests. I have a registered trail bike but its a different riding experience to the unregisterable motorbike I have.

Rec registration like in other states will allow me to ride my unroadworthy bike in the bush with registration and insurance.

This is not asking for anything out of the ordinary but a rec rego would open up many more options for riders and mainly kids who obviously dont own bikes with lights and blinkers.

Some motorcycle parks are hours away by car with high per person admission costs. Public land that is currently being used for riding should be accesible to families and all types of motor bikes through a basic AFFORDABLE rec rego.
