**To:** Transport and Resources Committee  
**Subject:** Petition submission for the Inquiry Into the economic and regulatory frameworks for Queensland's Island Resorts

This submission is made on behalf of the people who signed the change.org petition to Save Keswick Island.

The petition has 23 000 signatures. The predominant view is that the island and its inhabitants need protection and careful management. Other signees wanted the access to the national park and the preservation of our islands for future generations. We are pleased to see the lease with China Bloom (rebranded) reviewed so that a clean-up plan and other alternative remedial actions may begin.
