Subject: Keswick Island

To whom it may concern.

Obviously the public, who is your employer did not vote for Government's to sell/lease our soil, infrastructure to adversities as it is to be shown in not only this Keswick island case, but also many other policies including mass immigration and open borders policies, which the majority of Australian's are against, as the current research polls confirm.

The Chinese embassy in Adelaide will be shown to be a threat to the Australian public also. Pine Gap is now a strategic location to protect the safety of our country and our allies in Asia, plus various other countries and regions. Do I need to point that out!

The history of Government's incompetence but has also have been said by others, for 'personal reasons', government officials/members and representatives pursue these foreign sales of our infrastructure, land and Islands such as in the Keswick Island deal.

Darwin Port was a mistake clearly the public could see, but not the governments and officials.
Incompetence?

Andrew Robb must have been inspired by the sale of the Port, that he became employed by Landbridge post his political career.

Now it is muted to buy it back? I only hope the people making these decisions pay the difference out of their own pockets, not us the tax payer.

Some of the public would wonder if corruption is not the issue. Therefore, we are also able if one has intelligence of any degree, question the integrity of this organisation who this letter is addressed to.

I will give Australian's a tip, World War 3 is now foreseeable now than anytime in the past. The alliance of Russian/China is the biggest threat to world peace today in 2022, But still, we need to send these letters to warn of the situation of Keswick island, not to mention Pine Gap. Why?

History lesson for you.

Singapore was strategically populated by Japanese citizens prior to the Japanese invasion!

Singapore was successfully invaded but the crack troops of Australia's army were slaughtered under the watch of the British. Even McArthur was shocked. Researching the Arcadia agreement of 1941 might also make you aware of the loyalties of our allies have shown Australia in the past. Thank god for Admiral E. J. King or Australia would've been on its own. Churchill in WW1 and WW2 used Australian's and their assets with little regard for anyone bar the UK, and Europe, in my opinion. PM Curtin wasn't Churchill's lap dog. Chewing gum stuck to China's boot? Just paraphrasing something I've heard, a opinion of someone who knows, apparently.

Only fools do not learn from history.

I am able to be contracted on this email address for further insights or foresights, seeing Australian's representatives have debatable reasons for questionable policy decisions, that put Australian sovereignty at risk.

Ps. My Grandfather 24th Bat AIF served from 1915 to 1919 in Ww1 including Gallipoli, before Europe taking part in the first trench raids on French/ Belgium border.

My father served from 1939 to 1946 in WW2 in the SW Pacific region.

Do members of this organisation have a grandfather or a father, who fought for Australia?

My Grandmother who raised 5 children on her own after her husband died like many ex WW1 veterans did, 10yrs after the returning home in 1919. She predicted China would be a threat to the world, particularly Australia in the late 40's.

Her insight plus foresight and therefore intelligence, is far superior to those I write this letter or I wouldn't have to spend the time writing it.

Your organisation really won't read this but at least I am trying to protect Australia and our fast evaporating culture for its blatantly obvious demise. Such a rich Culture nearly gone forever already, 'She'll be alright' can no longer be said!

Yours faithfully

Mr Ryan, your employer.
