

## **Inquiry into the economic and regulatory frameworks for Queensland island resorts**

**Submission No:** 18  
**Submitted by:** Malcolm Elliott  
**Publication:** Making the submission and your name public  
**Attachments:** No attachment

### **Submitter Comments:**

I do not believe anyone holding a lease on any Queensland Island should be able to disrupt or interrupt the activities of permanent residents of said islands. They should not have the ability to close down or restrict access to long standing community facilities such as wharves or airfields, other than for temporary restrictions for upgrades or improvements to those facilities. They should not be permitted to interfere with native bush and landscape without specific permission from the Queensland Government or local Council.

### **Submitter Recommendations:**

A full and detailed plan must be submitted and approved by Government before any development and/or construction can be made on the islands.
