

Inquiry into the economic and regulatory frameworks for Queensland island resorts

Submission No: 20
Submitted by: Peter Kennedy

Submitter Comments:

Many foreign countries do not allow foreign ownership of land in their area of control. It's vital that Queensland ensures ownership and control of all islands remains in the hands of Australians. All islands within the Great Barrier Reef have a direct relationship with the reef and surrounding waters and wildlife. Land habitats on these islands must be preserved for the future.

Submitter Recommendations:

Keswick Island should be returned to Australian hands and rehabilitated.
