**Submitter Comments:**

I totally endorse this OBE submission.

OBE supplies a world class product which is exported to markets throughout the world as well as to their fellow Australians. So in turn

It is only right and fair that the conditions where their product is produced are continually assessed and kept up to that high standard as well in this day and age.

Also as discussed by OBE services used by those in the area of Birdsville Windorah and Bedourie include

Local operators servicing tourists which includes the annual Birdsville races and the Red Bash Health services and essential supplies.

My property is outback on the Barrier Highway. In fact there is one point on it that is 900 kilometres from Melbourne Sydney Canberra and

Adelaide. This Barrier highway gives crucial access and service to many critical areas from Perth through to Brisbane simply because there are sealed roads

In which case it is only in severe exceptional circumstances that it is un accessible.

I firmly believe that the Queensland government needs to be striving to service this same access to the Birdsville Windorah and Bedourie area in which

Case open it up to the world just as OBE services the world markets and can continue to serve without poor unnecessary road transport access problems ,

Best regards,

Janie McClure
