Dear TRC,

I read with interest that TRC is taking input from the community on an issue that is prevalent across Qld.

I think some simple additions to new vehicles would assist law enforcement authorities to actively catch those stealing cars:

1. New Vehicles - Onboard GPS, in combination with immobiliser which allow it to be disabled, tracked and located.
2. Older Vehicles - Onboard GPS either as stand alone or as a function of the Dash

This would allow vehicles to be easily and quickly located.

Thank you for allowing submissions on this topic.

Best Regards,

Ondrea Thompson
