Subject: #-1. Youth Crime And Housing Crisis In Queensland. People in The Positions are Failing to Act for Ordinary Voters Who Pay Government Wages in Favour of the %15. Gross Discrimination Violating Human Rights.
Date: Friday, February 23, 2024 7:26:31 AM

Dear Youth Justice Committee,

I have written to Hon Richard Miles, Qld Premier in Jan 2024.

Everybody is talking about harsh penalties and jailing kids which cost more and that will create more problems by angering kids turn into gangs American style. (1) It is better to show adults care and give hope, skills and (2) positive rehabilitative courses or mandatory counselling sessions for repeat offenders. While adults seem to have no understanding of youth once they were themselves is astonishing and too reactive and ignorant do not bother to find out why the kids are behaving this way. In fact, adults are behaving this way kids copy.(3) Sessions for adults how to be pro-active.

Adults' conduct (1) must be responsible for their children, not the state. (2) Adults watch what kids are watching and adhere strictly to (M) rated contents on all devices. Children watch and listen to adults in their homes, around town, on TV, on-line adults will say and do anything to suit their agenda and for profits in a predatory manner. Soon kids lose respect for self-absorbed adults, popularity contest politicians, profit driven companies who careless about others and kids environments. Adults and let kids watch block buster movies, internet sensations, local movies, video and computer and phone games create and introduce graphic casual and sinister sexual content and more graphic and glorified mass killings and teach both adults and kids how to successfully commit crimes. The adults old command, "Do As I Say, Not As I Do !" In fact, the news is full of adult criminals in every position of society setting an example for the future criminals.

Profitable block busters are remade over and over to hook the adults and kids copy adults eg Fast & Furious, Italian Jobs, Jason Bourne, Mr and Mrs Smith to name a few. When Bruce Lee movie appeared in theatres, many adults and kids joined Karate schools around the world. When Lady Diana appeared on TV, many adults and kids wore Lady Diana's fashion-clothes, accessories and hair around the world. (1) Television programs and movie contents must be labelled for suitability for children and responsible parents to follow. (2) Remove or Rate the level of violent content in childrens' programs.

Kids witness over and over, repeatedly everyday adults fail to show care enough to set an example of respect to others and for kids.

A. (1) Parental Code of Conduct. Adults behaving badly in house, angry on streets and at places make excuses to justify their disrespectful at times repeated criminal behaviours. This is exacerbated by current rental, housing and living crisis, again mainly created by adults.

B. People in position behaving badly justify their self-serving behaviour to keep their jobs at

times criminal acts. Entertaining the "Haves" and ignore the plea of the ordinary Australians esp "Have Nots." This includes people with disability.

C. Businesses behaving badly justify their greed and scheming lies and at times criminal in a predatory manner towards unsuspected adults as well as kids. Standard has deteriorated as it used to be illegal to use speeding cars for advertisements citing encourage buyers to speed eg KIA. R-rated advertisement used to be past midnight now before the movie kids watch ends.
(1) Advertising Code of Conduct guideline enforcement.

D. (1) Code of Conduct for Professionals. Standards have deteriorated. Professionals were not allowed to endorse products on TV citing conflict of interest yet self-serving adults so call "experts" endorsing unhealthy products as safe eg Vaping, adult cosmetics, apps, gadgets start targeting youth since Barbie and other movies.

1. Adults commit crimes everyday. Parents steal from shops and use kids as decoy or train kids to steal and blame crime on kids. Coach kids for parents benefits (1) Child Abuse-Exploitation.
2. Adults verbal and physical violence at homes, road-rage on roads and fights at gatherings and public places even killings due selfishness, ill-mannerism, scheming lies, alcohol, racism, drugs.
3. Television, wrongdoings against innocent people, constant and severe violence and killings against people by the criminals and justify violence and killings by police and mass killings by the governments.
4. (1) Companies Code of Conduct. Profiteering by creating and using false, fear, coercive peer-pressure enhancing marketing tactics. Companies profiting from making addictive extremely violent and surreal killing arcade video machines, pocket gadgets, phone, lap top and computer video games connect to TV for adults and kids. One gets points for running over with a target with a car or shoot with a gun. Targets are-a person 10 points, a dog 20, elderly 50, baby 100. Xbox video game realistic mass killing battle for more points. TV block buster movies are almost all justified mass killings. It is a fact that people, both adults and kids can become addicted to violence and killings from constant exposure to them esp for more points, in movies for money-contract killing and justified-glorified killing. Movies and murder programs and internet how to programs show in detail how to commit range of crimes including how to scam and scheme money from people. Big companies are doing it for real. Vulnerable minds are easily corrupted. Specially speeding cars on TV and video.

Ones who can afford drag race expensive cars or hot up cars and ones who cannot afford steal cars.

Tactics used by criminal adults and kids are straight from movies, murder-crime shows and internet.

The list is endless.

In US, military handed out video games to high schools to recruit future soldiers resulting in mass school shootings. It is getting out of hand and Australia is following US as usual.

(1) Manufacturer Rating-Violent Content for Parents by to limit the video games of content of violence for points, glorified killings and sex content esp rape. Age management by parents and manufacturer and retailers same as cigarettes and alcohol.

Adults stop encouraging and playing violent and speeding car games.

Show kids you care enough to demonstrate respect to them instead of demanding (Do as I say, not as I do.) There are many existing programs and services to support these kids to fund and fund enough to expand these programs instead of cutting fundings to them. Free TAFE. Mr John Howard had free university yet introduced university fees for next generation, not fair.

Spend public money wisely. It costs more to detain with worse outcome. Repeat offenders receive extended care not jail. Jailing will make them angry and angrier. They do not care what happens to them because adults do not care enough to consult them.

You are in the right position at the right time to solve both concerned fearful adults and fearful kids who sees no hope the way the adults are. More kids join protest of some kind some way for this reason.

Living crisis. Coles and Woolworth Markets are not the only retailers profiteering. Smaller chain stores must be investigated. You need a team of researchers research into opportunistic chain markets. Investigating easy targets. How about investigating the real cause of the problem? Racketeering !

Many laws are violated yet ignored by people in positions. Ordinary individuals, professionals, tradies, small businesses, families and kids are suffering. Infact, racketeering is a crime. One of them is real estate industry. You will not escape this obvious problem by pretending it does not exist. As fast as the new houses are built greedy will snap up and none for the average Australians. (1.) Rental cap and (2.) limit the purchase power of foreign and rich Australian investors. Presently, one greedy person can purchase 100 occupied homes and evict them or vacant houses and lands and left vacant and wait for increase in value then sell them and or more than one hundred properties, evict tenants illegally and put tenants who can afford future rent increase who are willing to put high bonds. Some investors are telling other like-minded to do the same. Some convert illegal shed for rent violate council law also violate human rights law. (3.) Code of Conduct for Real Estate Agents and Landlords. (4.) Code of Conduct for Property Investors. Some real estate agents also involve in racketeering with landlords. Applications condition demand agreement to collected personal details for marketing (agents profiteering) and extra money for bond and more extra money for extra condition on false pretence. There are more nasties. I have reported this criminal activities to ACCC and others.

This is only a brief summary for immediate action.

Regards,
Manuel Otarra.
