**WATER TANK FILTERING SYSTEM DISPLAY**

**Mr WELLINGTON** (Nicklin—IND) (10.08 a.m.): I rise to draw the attention of the House to the water tank filtering system display situated at the QUT end of the Speaker's Green. Members may recall that when I spoke on the rainwater tank rebate motion during the last sitting of Parliament I referred to an offer I received from the Speaker to set up a display of a water diverter and water tank sack filter as an alternative to my tabling a sample of these devices for the benefit of honourable members. Thank you, Mr Speaker, for allowing this working display to be located at the QUT end of the Speaker's Green. I invite all members and interested parties to inspect this display.
