MINISTERIAL STATEMENT

Coronavirus, Vaccination

 **Hon. YM D'ATH** (Redcliffe—ALP) (Minister for Health and Ambulance Services) (9.56 am): I wish to correct the record in relation to the vaccination statistics. The information we have received this morning has updated those statistics. The Premier has already identified what the updated figures for our vaccination rates are. The good news is that it is still over 50 per cent. We are very proud of the work that all of our health workers have done. We want to see that vaccination rate get much higher. We call on every member of parliament to encourage their communities to come out and get vaccinated, to stop the argument around the vaccine and actually encourage people to get vaccinated.
