

Question on Notice
No. 1584
Asked on 1 December 2021

Mr D Crisafulli asked Premier and Minister for the Olympics (Hon. A Palaszczuk)—

QUESTION:

With reference to the Premier's comments that there is an infrastructure pipeline for the 2032 Olympic Games—

Will the Premier list all projects included in this pipeline and a timeline for each project's delivery?

ANSWER:

Over the next 20 years the Brisbane 2032 Olympic and Paralympic Games is forecast to generate \$8.1 billion in benefits for Queensland and \$17.6 billion in benefits for Australia, including, increased international tourism and trade. It will also generate up to 91,600 FTE job years (FTE jobs per year) in Queensland and 122,900 FTE job years across the nation.

The infrastructure being accelerated to deliver Games-ready venues by 2032 will deliver a huge 10-year pipeline of jobs across the development and construction industry and deliver legacy projects that will provide benefits to Queenslanders for years to come.

Early planning stages for the Venues Master Plan have begun, with construction of six new and eight upgraded venues expected to commence from 2024.

During Brisbane 2032, the athletes and officials will be accommodated in Villages that leverage three planned developments in Northshore Hamilton, Robina and the Sunshine Coast.

The Brisbane 2032 submission includes the infrastructure projects to support the Games and can be accessed here: <https://www.qld.gov.au/about/Brisbane2032>

As with other future infrastructure projects the funding and timelines for project delivery for Games infrastructure will be set out in future budget papers and the State Infrastructure Strategy which details the infrastructure pipeline.
