

**Question on Notice  
No. 951  
Asked on 31 August 2004**

QUESTION:

MR HORAN asked the Minister for Environment, Local Government, Planning and Women (Ms Boyle)—

With reference to the removal of Equine Infectious Anaemia from the Queensland Notifiable Diseases Schedule 6 in 2002 and the recent reintroduction of this disease into the schedule as a notifiable disease and now that this serious disease is notifiable—

What action will she be taking for the detection, control and eradication of this disease to protect Queensland's domestic and export equine industry?

ANSWER:

This question would be more appropriately addressed to my colleague the Minister for Primary Industries and Fisheries.
