

**Question on Notice
No. 414
Asked on 24 March 2005**

MR QUINN asked the Minister for Health (MR NUTTALL)—

QUESTION:

Will he advise the number of people that were listed for and the number of people whom actually received (reported separately) cataract procedures for each public hospital in Queensland (reported separately) for 2002-03, 2003-04 and 2004-05 [year to date] (reported separately)?

ANSWER:

The number of patients listed for specific procedures such as cataract surgery are not available retrospectively. However, retrospective data on the total number of patients waiting for elective admissions is available from census data as published.

Table 1 identifies the number of people that received cataract procedures for public hospitals in Queensland reported separately for 2002-03, 2003-04. Data for 2004-05 year-to-date has not been finalised.

Table 1**Number of patients having cataract procedures performed in
Queensland acute public hospitals**
