

**Question on Notice
No. 758
Asked on Tuesday, 24 May 2005**

MR ROWELL asked the Minister for Emergency Services (MR CUMMINS)—

QUESTION:

What is the (a) Code 1, (b) Code 2 and (c) Code 3 and 4 response times for each ambulance station (reported monthly) in Queensland for each of the last two financial years and for the year to date?

ANSWER:

As evidence of this Government's commitment to improving the ambulance services provided to the Queensland community, during the 2003-04 budget the Beattie Government announced the appointment of 110 new paramedics at a cost of \$6.27 million. All of the 110 paramedics have now been stationed across the State. This term of Government we have committed a further \$35.9 million to recruit at least 240 extra paramedics, \$28.6 million for 22 new or refurbished ambulance stations and \$29.5 million for 200 new or refurbished ambulance vehicles.

Also, I am pleased to note that the Queensland Ambulance Service, as at the end of April 2005, has recorded its tenth consecutive improvement in monthly response times to emergency code 1 incidents.

Please note there are no published response time target for Code 2 responses, and Code 3 and Code 4 responses are not reported or measured in terms of response times. Accordingly, the QAS has not developed a report to capture that data.

For the periods prior to July 2003, the QAS is unable to provide a breakdown of response times to an ambulance station level for Code 1 cases as the QAS did not record this data at that time.

Attachments A and B contain the response time data for all ambulance locations across the State, including first responder, honorary and permanent full-time ambulance stations, for the 2003-04 financial year (attachment A) and for the period 1 July 2004 to 31 May 2005 in the 2004-05 financial year (attachment B).

This data refers to the percentage of Code 1 responses where the first ambulance vehicle arrived on the scene in less than 10 minutes.
