

Question on Notice

No. 897

Asked on 7 June 2005

MR MESSENGER ASKED THE MINISTER FOR EDUCATION AND THE ARTS (MS BLIGH)

QUESTION:

For 2004-05 will she provide details on (a) the number of assets that have been written off the capital items register, (b) a description of each asset that has been written off the capital items register, (c) the total value of assets written off the capital items register and (d) the reason why each asset has been written off the capital items register?

ANSWER:

The total number of assets written off from the Education capital items register for 2004-05 as at 14 June 2005 is 116.

The department's reportable threshold for capital assets is \$5000. Therefore all assets written off which had an original acquisition value of \$5000 or greater have been included in the answer to this question.

A list of the 116 items written off at value is attached providing a description of each asset written off (answer to question b) and the reason why each asset was written off (answer to question d).

The total value of these assets is \$237,032 (answer to question c).

There were an additional 528 assets that were written out of the capital items register that had a nil value and were written out as having reached the end of their useful lives.

Similarly Arts Queensland wrote off 14 assets and the Corporate Administration Agency wrote off 27 assets. All assets had been written down to zero as all had reached the end of their useful lives. The assets were scrapped because they were technologically obsolete, not economical to repair and not in a condition to be sold at auction.
