

Question on Notice

No. 782

Asked on 24 May 2007

MR JOHNSON asked the Minister for Transport and Main Roads (MR LUCAS) –

QUESTION:

With reference to new bus services subsidised by Queensland Transport for each year since 2004 (reported separately) -

- (1) How many new bus services have been subsidised by Queensland Transport?
- (2) For each new bus service what level of funding did each service attract (reported separately)?

ANSWER:

I thank the Honourable Member for his question.

South East Queensland

(1) The Beattie Government has presided over a revolution in public transport with TransLink.

Beattie Government Public Transport Revolution

Public Transport Services

Year	Expenditure	Patronage
1997/98 (National/Liberal)	\$365 m	103 million journeys
2006/07 (projected) (Beattie Labor)	\$733 m (\$507 million net of revenue)	162 million journeys
Increase	\$368 m 101% (\$142 million net of revenue – 39%)	59 million 57%

Public Transport Infrastructure

Year	Fixed Capital Expenditure*
1997/98	\$44m
2006/07	\$309m
Increase	\$265 million – 602%

*** note – does not include rail investment**

The current State budget commits an additional \$24m each year through for the TransLink Network Plan (TNP) to further improve urban bus services in South East Queensland (SEQ).

Since the introduction of TransLink in 2004-05 – 2007-08 the Queensland Government has committed an additional \$90m each year in funding for urban bus services in SEQ.

A list of specific TransLink service changes for the period July 2004 to June 2007 is set out in the attached table. (Attachment 1) Passengers are voting with their feet in supporting new and improved services. Bus patronage has increased by approximately 40% since TransLink commenced and over 500 new buses have entered service to date.

Sub Region	Patronage %
Brisbane City	34%
Caboolture, Pine Rivers, Redcliffe	65%
Ipswich	91%
Redlands	60%
Gold Coast	36%
Sunshine Coast	88%
Logan, Park Ridge	117%

(2) Since 2004-05, nearly \$56m per year worth of service enhancements have been introduced. In 2006-07, investment across the seven subregions making up the TransLink network to date is as follows:

Subregion	Additional Funding (pa)
Brisbane City	\$21.3m
Caboolture, Pine Rivers, Redcliffe	\$2.4m
Ipswich	\$4.4m
Redlands	\$3.7m
Gold Coast	\$7.5m
Sunshine Coast	\$8.1m
Logan, Park Ridge	\$8.4m

The balance of the new service initiatives will be rolled out in 2007-08. This will include over \$10m in new services for Brisbane, Gold Coast, Northern and Southern subregions plus an allocation in the 2007-08 budget of the \$24m for the TNP.

This will be allocated by TransLink on a prioritised basis with a focus on addressing overcrowding issues on key routes.

The cost of service initiatives in SEQ since July 2006 is as follows.

- In July 2006, the State Government funded \$2.88m per annum worth of bus services to address overcrowding in Redlands, Logan and Brisbane.
- A \$3.5m per annum package of service improvements commenced in Brisbane on 23 October 2006, including the Moggill 444 BUZ.
- The government, through TransLink spent a further \$975,000 per annum on 18 December 2006 when the new Eleanor Schonell Bridge services commenced.
- In November 2006, the government through TransLink spent \$300,000 per annum on service improvements in Ipswich to provide a higher level of service reliability and connectivity.

- A further \$900,000 per annum was spent in the Sunshine Coast in November 2006 for the provision of two new services to cater for the opening of a new retail precinct, service the Sunshine Coast Private Hospital and provide services to areas that previously did not have access to bus services.
- On 19 February 2007, TransLink implemented a further \$3.1m per annum of bus service improvements to provide an additional 1,336 trips each week in Brisbane. In total about \$12m will be spent improving bus services for Brisbane between July 2006 and July 2007, with a \$4m package of service improvements planned for 23 July 2007.
- In March 2007, TransLink spent a further \$1.5m per annum on services in Ipswich to cater for the opening of two new retail precincts and to cater for an increase in student numbers to Education City at Springfield.
- Also in the month of March 2007, TransLink spent approximately \$300,000 per annum implementing weekend and public holiday services in the Bray Park, Lawnton, Joyner and Strathpine areas.
- In April 2007, TransLink spent approximately \$1m per annum to provide additional services to cater for existing and immediate future demand for extra services from Logan to the Brisbane CBD.

New Long Distance Bus Services

The Queensland Government provides about \$2.4m in subsidy for 17 rural and remote long distance bus routes throughout the State, supporting travel by more than 117 000 passengers at an average subsidy for each passenger of around \$21. This ensures access to essential services in larger population centres for more than 50 communities.

Service	Operator	Commencement date	2005/06 Subsidy (excl GST)	Est. 2006/07 Subsidy (excl GST)	Subsidy per passenger

New Services in Urban Areas

The Government provides a significant funding support for the provision of urban bus services across regional Queensland. It is estimated that in 2006-07 funding support will total \$26m and will have carried close to 10 million fare paying passengers.

The Government is also introducing an exciting new initiative for passenger transport services in regional Queensland called *qconnect*. The major initiatives currently being implemented under *qconnect* are:

- standardising bus fares to make them more equitable with South East Queensland;
- wheelchair accessible taxis in regional Queensland; and;
- introduction of secure taxi ranks in regional areas.

\$12.1m has been committed to introduce standardised bus fares and zones in regional towns and cities. This will see some significant reductions in bus fares, particularly the longer distance fares. It will also allow greater integration between services and make bus travel easier and seamless.
