

Question on Notice

No. 1760

Asked on 13 November 2008

Mr Langbroek asked the Minister for Education and Training and Minister for the Arts (Mr Welford) —

QUESTION:

With reference to distance education—

- (1) Will he provide a list of the range of courses offered, broken down by student numbers (state student and non-state student), region of students, and student year level?
- (2) Will he also state the cost to the government of providing each course and the costs recouped through user charges?

ANSWER:

There are currently 2569 home based enrolments, 1062 state school based enrolments and 899 non-state school enrolments at Queensland's SSDE. Over 50% of the non-state school based enrolments come from schools in the Greater Brisbane, Sunshine Coast and South Coast regions.

The cost of providing a subject per student is approximately:

- \$1939 for junior secondary subjects
- \$2543 for senior secondary subjects
- \$2947 for a language other than English subject

All non-state schools receive between \$1172 and \$7723 per student enrolment in state funding depending on need, as well as funding from the Commonwealth Government.

The total cost to the Queensland Government of providing education through SSDE to non-state school students is over \$2.3m in 2008.

In 2008, all schools are required to pay a general resource levy of up to \$100 and specific subject resource charges between \$10 and \$170 per annum depending on the subject choice.

The list of courses offered, broken down by students numbers (state and non-state), region of students, and each year level is attached.

Distance Education Enrolment Data as at July 2008
