

**QUESTION ON NOTICE**  
**No. 174**  
**Asked on 18 March 2014**

**MR KNUTH** asked the Minister for Agriculture, Fisheries and Forestry (MR McVEIGH)–

**QUESTION:**

Will the Minister advise locations where the Mitchell and Barron Rivers have intertwined or met in a natural watercourse, wetland or flood that would allow crayfish species to migrate naturally between these systems?

**ANSWER:**

The Department of Agriculture, Fisheries and Forestry does not routinely seek information of that nature. However, I am not aware that the Mitchell and Barron Rivers ever intersect in such a way that would allow crayfish species to migrate naturally between the systems.
