

## QUESTION ON NOTICE

No. 666

asked on Thursday, 17 May 2018

---

**MR T SORENSEN** ASKED THE MINISTER FOR NATURAL RESOURCES, MINES AND ENERGY (HON DR A LYNHAM)—

### QUESTION:

Will the Minister outline any further energy demand management policies of the Palaszczuk Government that are yet to be announced?

### ANSWER:

The Queensland Government has a very clear election commitment to implement an energy efficiency scheme.

The Department of Natural Resources, Mines and Energy is investigating how best to implement the scheme and how it can support Queenslanders in reducing their energy costs.

The government will be provided with detailed advice in early 2019 on possible options for a Queensland Energy Efficiency Scheme. Stakeholder consultation will occur in mid-2019, with the scheme to commence in mid-2020.
