

## QUESTION ON NOTICE

No. 54

asked on Wednesday, 13 February 2019

---

**MS A LEAHY** ASKED THE MINISTER FOR NATURAL RESOURCES, MINES AND ENERGY (HON DR A LYNHAM)—

QUESTION:

With reference to the domestic water supplies for local government in Queensland—

Will the Minister advise the current level of water supply for each council in Queensland and the number of months of supply available to each council (reported separately by council)?

ANSWER:

While the Department of Natural Resources, Mines and Energy requires water service providers—the majority of which are local governments—to report annually on key performance indicators which include the number of months of supply remaining, it is the responsibility of those local governments to deliver urban water supplies. This information is reported for the previous financial year and is received in October each year. The October 2018 key performance indicator data—the number of months of supply remaining as at 30 June 2018 for each service provider and reported scheme—is provided in Attachment 1.

In addition, the department also surveys water service providers' water supply status on a voluntary basis three times a year. This survey requests information on months of supply remaining, and has a response rate of approximately 60 per cent. In South East Queensland, the water supply grid is at 71.9 per cent (as at 18 February 2019). This data is included in Attachment 1. Seqwater has a drought response plan which has measures to safeguard water supplies to the region, and includes full operation of the Gold Coast desalination plant and water use restrictions.

**ATTACHMENT 1**

2017-18 Key Performance Indicator performance report data “Months of supply remaining” (provided by water service providers)

<b>Council</b>	<b>Scheme</b>	<b>Scheme Type</b>	<b>Months of supply remaining at 30 June 2018</b>
Aurukun Shire Council	Aurukun Water	Potable	12
Balonne Shire Council	Bollon PW Supply	Potable	12
