

QUESTION ON NOTICE

No. 573

asked on Thursday, 4 April 2019

MR L MILLAR ASKED THE MINISTER FOR NATURAL RESOURCES, MINES AND ENERGY (HON DR A LYNHAM)—

QUESTION:

Will the Minister provide an update on the progress on implementing the findings of the statewide hydro-electric study under the Power North Queensland Plan?

ANSWER:

The hydroelectric and pumped storage hydroelectric study is currently underway.

The study is considering the long-term role of hydroelectric and pumped storage hydroelectric generation and storage capacity in the Queensland grid, and is also considering a number of potential sites across Queensland, and the potential role of the Queensland Government in relation to the development of these sites.
