

Question on Notice

No. 158

Asked on Tuesday, 18 February 2020

MR E SORENSEN ASKED THE MINISTER FOR ENVIRONMENT AND THE GREAT BARRIER REEF, MINISTER FOR SCIENCE AND MINISTER FOR THE ARTS (HON L ENOCH)—

QUESTION:

With reference to answer to Question Without Notice asked on 6 February 2020 about Bushfires, Wildlife—

Will the Minister (a) provide the names of the 648 threatened species and (b) advise if the Fraser Island Dingo is on the threatened species list?

ANSWER:

I thank the Honourable Member for the question.

The list of 648 threatened species potentially impacted by fire is provided at Attachment 1. Threatened species includes species listed under either the *Nature Conservation Act 1992* or the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999*.

This list was compiled based on the Department of Environment and Science's recorded and modelled distribution of threatened species, intersected with fire extent information provided by Queensland Fire and Emergency Services.

The K'gari (Fraser Island) dingo is not on the threatened species list, however it is a protected species under the *Nature Conservation Act 1992*.
